DETAILED ACTION

*Response to Arguments*

1. Applicant's arguments, see paper #8, filed 04-28-03, with respect to the rejection(s) of claim(s) 1-7 and 12-18 under 35 U.S.C. 102(e) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Scoggins(US 6,469,587 of record).

*Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 9, " control terminals" lack proper antecedent basis.

In claim 8, line 10, " control terminals" lack proper antecedent basis.

All dependent claims for 1 and 8 are indefinite too.

*Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2817

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3,4 ,5, 7,8,9,10,11,13,14,16, and 17(as best understood) are rejected under 35 U.S.C. 102(e) as being anticipated by Scoggins(US 6,469,587 of record).

The reference by Scoggins discloses an apparatus including filter circuit(L1,L2,C11,C12)(see figure 5), coupled within a VCO(202) which comprises MOSFETs

(see col. 11, lines 5-20)(insulated gate) varactors(V1,V2, diodes). A power supply(Vcc) and reference terminal(GND) are shown as well as the control terminal Vcntrl(see figure 5). The control signal having a polarity of the power supply signal and a magnitude less than or equal to the power supply magnitude as a result of the connections as shown.

Note bias circuitry includes (Q13, R13,14). The resonant circuit comprises (L1,2, and varactors). The voltage controlled oscillation signal(output at Vop,on) is a function of the supply, control and biasing voltages.

*Allowable Subject Matter*

3. Claims 2,6, and 12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 2817

4. Claims 15 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The examiner could not find fair suggestion for the LPF shunt filter with charge pump to generate control voltage.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arnold M Kinhead whose telephone number is 703-305-3486. The examiner can normally be reached on Mon-Fri, 8:30 am -5 pm.
